My dear

I am afflicted with lactose sensitivity, osteoporosis and sinusitis. I am a non-Hungarian and am attempting to take care of my health especially in areas where the medicos throw up their hands and simply say: "there is neither amelioration nor cure for this!!!"

Gero Vita International, 130 Denison Street Dept. 77 71540
71450, Markham Ontario, Canada has evolved amelioration or cure for thousands of people throughout the world. It can be purchased over-the counter in all civilized countries, the UNI

TED States alone excepted. It is made entirely from organic plants and is harmless no matter how fiercely one loads one's guts up with it.

It is being so widely accepted that it has alarmed the medical monopoly and drug trusts in this country.. They have reached their long arms into the Federal Department of Agriculture which has proposed new restrictive regulations on nutritional supplements that can be placed in medicine. The FDA will name the supplements. The Fda is asking congress to pass laws restricting the supplements.

When did the FDA become the world's final authority on medicines that will cure diseases???? This will overrule Harvard Medical School, the University of Pennsylvania Medical School and all the other Medical Schools.

I am herein importuning you to vote this down when it comes up for a vote in the United States Congress.

I apologize for this long letter but I wanted you to know the facts of the case.

In the spirit of planting a human garden,

McDonald Wiley
